Immediate Savings

A IRS Section 125 IRC Cafeteria Plan creates instant and guaranteed tax savings for unions and their contributing employers. By allowing members to use pre-tax dollars for eligible benefits, it reduces taxable wages—lowering FICA expenses and putting more take-home pay back into members' pockets from day one. This is a responsible financial decision that delivers real savings without increasing union costs.

Non-measurable Savings

Beyond the immediate tax advantages, a IRS Section 125 IRC Cafeteria Plan strengthens union culture and long-term financial health. When members feel supported with meaningful benefits, morale increases, loyalty grows, and turnover decreases—saving unions time, resources, and the hidden costs of member disengagement.

These quality-of-life improvements create a stronger, more unified membership.

Offloading Claim Savings

A IRS Section 125 IRC Cafeteria Plan can help reduce the strain on traditional health insurance plans when certain services are accessed outside of the primary group health policy. Fewer claims contribute to more stable healthcare costs and can help protect unions and employers from steep annual premium increases. This proactive approach allows union leadership to safeguard resources and maintain long-term benefit affordability for members.
